

**November 19<sup>th</sup> & 20<sup>th</sup>, 2008**

**Addictions Treatment Design for Youth & Adults Affected by Fetal Alcohol Spectrum Disorder**

Presented by Liz Lawryk BSW MSc. H.S. RSW

Chief Clinical Examiner, **OBD** Triage Institute, Calgary, Alberta, Canada

This two-day certificate (10 hours) workshop will focus on FASD sensitive treatment considerations, effective intervention strategies and intervention techniques for professionals involved in addictions prevention, treatment, counseling and aftercare.

The goals of this seminar are to:

- Update clinical therapists and addictions specialists with the current medical, cognitive and sensory integration issues within this patient population.
- Provide participants with evaluation tools to determine the best course of individualized treatment plan for the individual by evaluating medical disposition, social history, cultural factors and learning abilities.
- Discuss variables in treatment modalities and establish strength-based, consistent provision of patient specific care and service delivery.
- Guest speaker, Myles Himmelreich will be in attendance to discuss his life and professional experiences living with a diagnosis of FASD.

The workshop will be held from 8:30 a.m. – 4:00 p.m. both days

**At the Greenwood Inn, 3515 26 St. N.E. Calgary, Alberta**

\*Please note that this advanced workshop is intended for professionals in the addictions field with previous knowledge of FASD and a letter of reference for admission is required. Space for this session is limited. Participants must complete the full 10 hours in order to receive certificate of completion.

**Deadline for registration and payment is Nov. 6, 2008 and is non-refundable.**
