

Nov. 25th & 26th, 2009

Interviewing Women Regarding Substance Use in Pregnancy

**OBD Triage Training: Screening for
Fetal Alcohol Spectrum Disorder**

Presented by Liz Lawryk BSW MSc. H.S. RSW

Chief Clinical Examiner, **OBD** Triage Institute, Calgary, Alberta, Canada

This two-day certificate (12 hours) workshop will focus on utilizing the **OBD** Triage Instrument, gathering accurate information necessary for medical evaluation and diagnosis of FASD and related issues. The focus is on best practices in respectful motivational interviewing techniques with biological mothers who may have consumed alcohol or drugs in their pregnancy(ies). Screening includes exploration of various teratogenic possibilities and variables to ensure and enhance responsible medical evaluation by the diagnostic physician.

*Please note that this advanced workshop is intended for nursing professionals in the field with previous knowledge of FASD and a letter of reference and confirmation of educational credentials for admission is required. Space for this session is limited.

Participants must complete the full 14 hours in order to receive certificate of completion.

This course has been reviewed and included on the Canadian Centre of Substance Abuse Resource Data Bank

8:15 a.m. – 4:00 p.m. – November 25th & 26th, 2009
